

```
package org.constructor;

public class Constructor {

    private String name;
    Constructor() {
        System.out.println("Constructor Called:");
        name = "Programiz";
    }

    public static void main(String[] args) {
        Main obj = new Main();
        System.out.println("The name is " + obj.name);
    }
}
```
